

# Title of your Thesis

Your Name

A thesis submitted to the University of Ottawa in partial  
fulfillment of the requirements for the degree of  
Doctor of Philosophy

Department of Electrical Engineering and Computer Science  
Faculty of Engineering  
University of Ottawa

Supervisors:  
Professor \*\*\*

© Your name, Ottawa, Ontario, Canada, 2024

## **Examining Committee Members**

The following served on the Examining Committee for this thesis proposal. The decision of the Examining Committee is by majority vote.

External Examiner:	First Examiner Professor, School of System and Computer Engineering, University of Carleton
Supervisor(s):	Name of your Supervisors Associate Professor, School of Electrical Engineering and Computer Science
Internal Member:	Second Examiner Professor, School of Electrical Engineering and Computer Science  Third Examiner Professor, School of Electrical Engineering and Computer Science

## **Abstract**

This is the abstract.

## **Acknowledgements**

I would like to thank all the little people who made this thesis possible.

## **Dedication**

To  
Your Loved ones

# Appendix A

## Matlab Code for Making a PDF Plot

### A.1 Using the Graphical User Interface

Properties of Matab plots can be adjusted from the plot window via a graphical interface. Under the Desktop menu in the Figure window, select the Property Editor. You may also want to check the Plot Browser and Figure Palette for more tools. To adjust properties of the axes, look under the Edit menu and select Axes Properties.

To set the figure size and to save as PDF or other file formats, click the Export Setup button in the figure Property Editor.

### A.2 From the Command Line

All figure properties can also be manipulated from the command line. Here's an example:

```
x=[0:0.1:pi];
hold on % Plot multiple traces on one figure
plot(x,sin(x))
plot(x,cos(x),'--r')
plot(x,tan(x),'.-g')
title('Some Trig Functions Over 0 to \pi') % Note LaTeX markup!
legend('{\it sin}(x)', '{\it cos}(x)', '{\it tan}(x)')
hold off
```

```
set(gca,'Ylim',[-3 3]) % Adjust Y limits of "current axes"  
set(gcf,'Units','inches') % Set figure size units of "current figure"  
set(gcf,'Position',[0,0,6,4]) % Set figure width (6 in.) and height (4 in.)  
cd n:\thesis\plots % Select where to save  
print -dpdf plot.pdf % Save as PDF
```
